Arkan **Abuyazid**

Dallas, TX

ata757@tamu.edu | aabuyazid | arkan-abuyazid | Work Authorization: U.S. Person

Education

Texas A&M University - College Station

GPA: 3.9/4.0

Master's of Computer Science — *Dec 2026*

- Relevant Coursework: Parallel Computing, {Deep, Reinforcement} Learning, Database Systems, Software Engineering

University of Texas at Austin

GPA: 3.6/4.0

Bachelors of Science, Electrical and Computer Engineering

- Award: 1st in Image Processing Competition - Prototyped a computer vision assistive tool for the blind, Voted out of ~10 projects
- Award: 3rd in Embedded Systems Lab Competition - Built an audio visualizer with a focus on mood, Voted out of ~8 projects

Skills

Programming Languages	C#, Java, Javascript, Python, C/C++, MySQL, PostgreSQL, Bash, HTML, CSS
Tech Stack	.NET, Spring, Angular.js, Maven, Rails, JUnit, Tensorflow, Git, Postman, Docker, Linux
Languages	English (Native), Indonesian (Professional), Japanese (Conversational), Turkish (Learning!)

Relevant Experience

AT&T - American Telecommunication Conglomerate

Dallas, Texas

Software Engineer I — *Jan 2026 - Present*

- Building enterprise-grade lifecycle management software for **1,200+ internal users** to streamline collaboration between various business units and early career engineers in internal technology development program
- Coordinating across leadership to scope out and deliver features critical to the business and health of the development program
- Optimized data retrieval in the backend from production database, leading to a performance **speedup of 15%**

Ansys (Part of Synopsys) - Computational Engineering Simulation Firm

Evanston, Illinois

AI Software Engineering Intern — *Sep 2025 - Dec 2025*

- Integrated, evaluated, and advanced graph neural network research for the geometric backend of physics simulation software
- Engineered end-to-end ML workflow, enabling robust extraction of machining features from CAD data
- Developed Python APIs to bridge the C/C++ geometric backend with PyTorch models for seamless user experience

AT&T - American Telecommunication Conglomerate

Dallas, Texas

Software Engineering Intern — *Jun 2025 - Aug 2025*

- Maintained frontend and backend of internal learning and training platform, supporting development for **140,000+ users**
- Optimized the responsiveness of components, **reducing latency by ~90%** and improving user experience
- Built and integrated unit tests to strengthen the robustness of a critical service **impacting 30,000+ employees**
- **Saved ~$12,500 in man-hours** by streamlining and leading onboarding processes for interns and full-time hires

Aggies Coding Club - Collegiate Computer Science Club

College Station, Texas

Project Manager — *Feb 2024 - May 2025*

- Led product direction of 3D game engine that highlights user experience and **supporting** members in mastering software
- Designed and architected the engine and developed the action plan **for a team of 8 members**, driving the deployment of algorithms that generates 3D visuals, a system managing structural and physics data of objects, and a responsive user interface
- Voted "Fall 2024 Best Project Member" by ACC officers **out of 100+ students**, highlighting my impact to the project

DANA Indonesia - Digital Wallet Platform Valued at $1.2 Billion

Jakarta, Indonesia

Software Development Engineer — *Mar 2022 - Mar 2023*

- Engineered solutions to optimize customer's ability to perform bank, ATM, and peer-to-peer payments using **Java**
- Spearheaded projects to develop a payroll feature, producing new revenue streams totaling **$1.8M per year**
- Developed **microservices** using **Spring** to conduct millions of financial transactions daily, **attracting 100,000+ customers**

Additional Information

Teaching Assistant/Tutor	Instructed computer science courses of **75+ students** from hardware engineering to software design
Interests	Basketball, Pickleball, Tennis, Photograph, In pursuit of making the best matcha latte
Creative Software	Adobe Creative Suite, FL Studios
